

LOSS CONTROL
INSPECTION

A loss control/safety inspection shall be used to check facilities, operations, and actions throughout the District. The purpose of the inspection shall be to reveal overall conditions and to suggest any corrective action needed to bring the operations or facilities up to safety standards. Employee concerns shall be thoroughly investigated and reviewed, and employees commended for their effort to promote safety. Appropriate positive corrective actions shall be taken to eliminate potential accident causes. Inspections shall be performed by personnel trained in loss control and survey techniques. An insurance company or association Loss Control Representative can assist in training appropriate employees.

RECOMMENDATIONS
AND/OR CORRECTIONS

The following guidelines apply to the recommendations and/or corrections suggested as a result of a loss control/safety inspections:

1. Recommendations concerning immediately life-threatening situations shall be acted upon at once.
2. All unsafe conditions and unsafe practices shall be listed and described with sufficient detail to be understandable. Recommendations shall be developed to correct an adverse condition or unsafe practice.
3. All recommendations shall be reviewed by District management, supervisors, or committees, for approval or rejection.
4. If approved, the recommendation to correct the substandard condition or act shall be followed as specified.
5. If rejected, reasons shall be stated in writing so the recommendations can be revised and resubmitted for review.

FRIABLE AND
NONFRIABLE ASBESTOS -
CONTAINING MATERIALS
INSPECTION

All school buildings shall be inspected for friable and nonfriable asbestos-containing materials according to federal and state regulations.

NOTIFICATION

Employee, parent, and teacher organizations shall be notified according to law when friable asbestos-containing materials are found on a particular campus. (See DI) Notification shall include location of affected area, a guide for reducing asbestos exposure, and laboratory reports.

CONTROL

The District shall develop and implement a program of asbestos abatement that appropriately reduces and controls the risk of exposure to asbestos fibers.

RECORDS

Asbestos-related activities performed by the District shall be recorded by the appropriate administrator and maintained in both the school and the Education Center offices. The records shall be retained in accordance with applicable federal and state regulations. (See CKA)
