If a student takes one of the courses listed below during the regular school year and he or she fails the course, he or she may recover the credit by participating in the online Credit Recovery program. Courses are offered online through COMPASS in a computer lab setting and involve both online and offline work including a semester exam. Students move at their own pace using both text and the computer to achieve credit. Each course must be completed within 12 lab sessions. The cost is the same as regular summer school and students may register for one course per time slot. COMPASS Learning is an on-line program that does not allow for modification of content or delivery of instruction. These factors should be carefully considered before enrollment if student requires curriculum modifications and/or instructional accommodations. *Students are encouraged to register early for classes as they will fill quickly.* Because of strict state guidelines, attendance and promptness are essential. **Students cannot receive credit if the student is absent more than 2 hours, 45 minutes, which is equal to one session in the day.** Any time spent outside of class due to tardiness is accumulated as an absence.
